Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

The Investment Strategy will not invest in below securities/instruments:

S. No.	Securities/Instruments
1	Credit default swaps
2	Securitized debt
3	Debt instruments with special features (AT1 and AT2 Bonds)
4	Unit of Specialized Investment Fund
5	Debt Instruments with SO / CE
6	Repo/ reverse repo transactions in corporate debt securities

In accordance with clause 12.24 of SEBI Master Circular dated June 27, 2024 and clause 3.2 and 6.1.5 of the SEBI Circular dated February 27, 2025, the cumulative gross exposure through equity, equity related instruments, equity derivatives, debt, foreign securities, repo transactions, InvITs, other permitted securities/assets and such other securities/assets as may be permitted by the SEBI from time to time should not exceed 100% of the net assets of the Investment Strategy.

Pursuant to clause 12.25 of SEBI Master Circular dated June 27, 2024 and SEBI Letter to AMFI dated November 03, 2021, Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. Cash Equivalent shall consist of the following securities having residual maturity of less than 91 days:

- a) Government Securities;
- b) T-Bills; and
- c) Repo on Government securities

Pending deployment of the funds as per the investment objective of the Investment Strategy, the funds of the Investment Strategy may be parked in short term deposits of the scheduled commercial banks, subject to the guidelines and limits specified by clause 12.16 and 4.5 of SEBI Master Circular dated June 27, 2024 as amended from time to time.

Timelines for deployment of Funds mobilized in a New Fund Offer (NFO)

The funds mobilized during the New Fund Offer (NFO) shall be deployed in accordance with the asset allocation pattern of the Investment Strategy within 30 business days from the date of allotment of units. In exceptional cases where the AMC is not able to deploy the funds within this period, the AMC shall provide an explanation, including details of the efforts made to deploy the funds, to the Investment Committee of the AMC.

The Investment Committee may, if deemed necessary, shall extend the deployment timeline by an additional 30 business days, in accordance with SEBI circular dated February 27, 2025. While granting an extension, the Committee shall examine the root cause of the delay. However, an extension shall not be granted if the Investment Strategy's assets are liquid and readily available.

If the funds are not deployed as per the asset allocation specified in the Investment Strategy Information Document (ISID) within the stipulated and extended timelines, the following measures shall apply:

1. **Restriction on Fresh Subscriptions:** The AMC shall not accept fresh inflows into the Investment Strategy until the funds are deployed as per the ISID.
2. **Waiver of Exit Load:** No exit load shall be levied on investors exiting the Investment Strategy after 60 business days of non-complying with the asset allocation.
3. **Investor Notification:** The AMC shall inform all NFO investors about their option to exit the Investment Strategy without an exit load via email, SMS, or other appropriate communication channels.
4. **Reporting to Trustees:** Any deviation from the deployment timelines shall be reported to the Trustees at each stage.

Rebalancing due to Short Term Defensive Consideration:

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations as per clause 1.14.1.2 (b) of SEBI Master Circular dated June 27, 2024, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

Rebalancing due to Passive Breaches:

Further, as per clause 2.9 of SEBI Master Circular dated June 27, 2024 and SEBI circular dated June 26, 2025, as may be amended from time to time, in the event of deviation from mandated asset allocation due to all type of passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Investment Strategy within 30 Business Days. In case the portfolio of the Investment Strategy is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if

it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in clause 2.9 of SEBI Master Circular dated June 27, 2024.

B. WHERE WILL THE INVESTMENT STRATEGY INVEST?

The Investment Strategy shall invest in below instruments:

- a. Equities and equity related instruments;
- b. Debt and money market instrument;
- c. Derivatives
- d. Certificate of Deposit
- e. Commercial Paper
- f. Repo of Government Securities
- g. Treasury Bill (T-Bill)
- h. Tri-party repo (TREPS)
- i. Securities created and issued by the Central and State Governments
- j. Corporate Bonds
- k. Non-convertible debentures and bonds
- l. Short Term Deposits
- m. Units of Infrastructure Investment Trust ('InvIT')
- n. Foreign Securities
- o. Units of Mutual Fund Schemes.

For details, please refer Section II.

C. WHAT IS THE INVESTMENT APPROACH?

The Investment Strategy primarily aims to derive its returns from equity and equity related instruments (minimum 80% exposure) and will focus on generating alpha from both long and short equity positions. Addition of a diversified derivatives portfolio can add to portfolio returns while simultaneously reducing the market risk by creating offsetting hedge or short positions. It's an active strategy.

Equity Portion: The Investment Strategy primarily aims to derive its returns from equity and equity related instruments (minimum 80% exposure). The strategy will have the flexibility to invest across large, mid and small cap segments without any sector bias. The stock selection process will involve evaluating Qualitative or Quantitative factors. Some examples of Qualitative and Quantitative Factors, are listed below. Please note that this is an illustrative list and not an exhaustive one:

Qualitative List (Business & Macro Context):

- Macro: Evaluates broad economic conditions that influence overall market and stock performance
- Industry dynamics: Assesses competitive forces, growth drivers and trends, and structural shifts within the sector.
- Themes: Identifies transformational trends which could re-rate/derate the industry valuations.

-Business strength: Tracks business moats, executions, business strategy, earnings delivery, market share gains/losses, product suite etc.

Quantitative List (Numbers & Market Behavior):

- Valuation: Determines whether a stock is priced attractively relative to its fundamentals or as compared to its peers.
- Factor participation: Assess stock's characteristics like quality, size, value etc. and how markets are preferring these factors.
- Market regimes: Analyses how the stock may perform under different market conditions like Risk-on, Risk-off, and stable conditions.
- Price trend: Tracks stock price movement patterns to gauge stock sentiment and potential directional strength/weakness

The strategy may exit some of these positions if the Fund Manager feels that some of these themes have adequately played out, or if the stock may need to make room for better ideas.

Debt Portion: Fixed income investments may include money market instruments, T-Bills, government bonds and rated corporate bonds. Funds retain the optionality to invest in liquid/overnight schemes of mutual funds within permissible limits and guidelines.

Derivative Portion: The strategy will create long and short positions through equity and index derivatives. The long positions will be for short technical and tactical opportunities. The short positions in derivatives will be used to partly hedge the existing equity portfolio and create unhedged short positions in stocks that are expected to underperform owing to various factors like business weakness, end market weakness, market share loss, value migration to other parts of business chain or excessive valuations. Index derivatives can be taken for increasing or decreasing participation in the markets. Further, the strategy will use options and futures. Options strategies can be used to earn derivatives yields or create a long/short position with a particular view on a stock, sector or index itself.

The scheme intends to keep a diversified portfolio of equity and equity derivatives which should limit stock specific risk. As the scheme is sector agnostic, it is expected to be reasonably diversified with participation from multiple sectors. Further, the schemes intends to reduce the overall market risk through use of derivatives (both hedged and unhedged shorting exposure) where derivatives positions will be diversified and can be used to lower overall beta of the fund.

The strategy is expected to experience high churn especially due to use of derivatives instruments which will primarily be used in the near month contracts. Some of these positions will need to be rolled over closer to the expiry of monthly derivatives contracts. Additionally, some of the ideas taken in the fund might be for short term tactical and technical plays.

DERIVATIVE STRATEGIES	RISK	MITIGATION/MANAGEMENT
I. Equity long-short (to capture both long and short alpha):		
•Buy the stocks expected to outperform and short the stocks expected to	Trade may not perform as per expectation	Limit the average single stock exposures especially on the short side well below prescribed

underperform		limits, to say ~5%
•Sector long-short to capture positive and negative view at sector level	Trade may not perform as per expectation	Limit the average net sector exposure to manageable levels, to say ~20%
•Pairs trading; captures positive and negative view on the stocks in the same sector	Trade may not perform as per expectation	Limit the average single stock exposure in the sector to well below prescribed limits, to say ~5%. Continuously monitor the risk reward of the pair basis cahnging fundamentals and valuations
•Merger arbitrage and Index rebalancing	Trade may not perform in the near term and spread may diverge before converging. Anticipated buying in stocks expected to be included in Index may not come	Initiate the position in small quantity, and gradually increase the position as the event day comes closer.
II. Index trading (to capture market directional trend):		
•Directional market; Buy or sell index derivatives based on market view	Trade may not perform as per expectation	Use options purchase along with futures and limit the combined exposure to say ~5% of NAV
•Index pair trading; captures positive and negative view on NIFTY50, BankNifty, Midcaps	Trade may not perform as per expectation	Although low risk trade as market directional bet (up or down) is not being taken here, but limit the combined exposure to the index pairs to say ~5% of NAV
III. Options trading (to capture derivatives yield and volatility dynamics):		
•Covered calls for derivatives yield	Stock may rise or fall significantly Vs the implied volatility as determined by the option price	Spread the bets over multiple stocks and limit the average single stock covered call expsoures well below prescribed limits, to say ~5%
•Straddle/strangle long short for volatility trading	Actual volatility may turn out higher for stocks, indices.	Continuously monitor and manage the delta exposure by existing the trade or further hedging the position by using derivatives to bring down the delta of the position. Also limit

		the exposure of the strategy to single security/index position to say ~5%
IV. Portfolio hedging (to protect the equity positions from market falls):		
•Arbitrage through stock options and futures	When arbitrated through calls, the stock may fall more than the call yield	Limit the average single stock arbitrage position using covered call well below prescribed limits, to say ~5%
•Hedging using Index derivatives	Tactical hedging may not work if market may move opposite to index derivative position	Keep the position tactical and exit the position within the month if it is not working

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Investment Strategy manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Investment Strategy manager involve uncertainty and decision of Investment Strategy manager may not always be profitable. No assurance can be given that the Investment Strategy manager will be able to identify or execute such strategies.

“The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

For detailed derivative strategies, please refer to SAI.

Portfolio Turnover

The Investment Strategy, being an open-ended Investment Strategy, it is expected that there would be a number of subscriptions and redemptions on a daily basis. The strategy is expected to experience high churn especially due to use of derivatives instruments which will primarily be used in the near month contracts. Some of these positions will need to be rolled over closer to the expiry of monthly derivatives contracts. Additionally, some of the ideas taken in the fund might be for short term tactical and technical plays. However, it is difficult to measure with reasonable accuracy the likely turnover in the portfolio of the Investment Strategy.

The portfolio may be churned in order to take advantage of movements in the securities market and to maximize the average returns on the portfolio while maintaining a desirable risk profile and adequate liquidity.

D. HOW WILL THE INVESTMENT STRATEGY BENCHMARK ITS PERFORMANCE?

The performance of the Investment Strategy is benchmarked against the BSE 500 TRI.

Justification: The benchmark is suitable for evaluating the Strategy’s performance because it mirrors the Strategy’s investment style. The Strategy’s net equity exposure matches the benchmark’s equity allocation and multi-cap structure, while the arbitrage portion delivers returns similar to debt.

The Trustee/AMC reserves the right to change the benchmark for the evaluation of the performance of the Investment Strategy from time to time, keeping in mind the investment objective of the Investment Strategy and the appropriateness of the benchmark, after obtaining relevant approval from SEBI.

v. Investments of AMC in the Investment Strategy –

The AMC reserves the right to invest its own funds in the Investment Strategy as may be decided by the AMC from time to time and in accordance with Securities and Exchange Board of India (Mutual Funds) (Second Amendment) Regulations, 2021, the AMC shall invest such amount in the Investment Strategy, based on the risk associated with the Investment Strategy. As specified in the clause 6.9 of SEBI Master Circular dated June 27, 2024, the AMC shall invest minimum amount as a percentage of assets under management ('AUM') in their Investment Strategy (s) in line with the Clause 6.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024. Such investment shall be maintained at all times and shall not be redeemed unless the Investment Strategy is wound up.

For details please refer (if any) <https://www.360.one/dyna-sif> - Not applicable since this is a new Investment Strategy.

The above investment shall be in accordance with clause 6.11 of SEBI Master Circular dated June 27, 2024 regarding minimum number of investors in the Investment Strategy/ Plan. Under the Regulations, the AMC is not permitted to charge any investment management and advisory fees.

Part III – OTHER DETAILS

A. COMPUTATION OF NAV

NAV of units under the Investment Strategy shall be calculated as shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Investment Strategy's investments} + \text{Current Assets} - \text{Current Liabilities and Provision (including accrued expenses)}}{\text{No. of Units outstanding under Investment Strategy/Plan on the Valuation Date}}$$

The NAV will be calculated up to four decimals. The first NAV will be calculated and announced not later than 5 working days from the date of allotment in the NFO. Thereafter, the NAV shall be calculated for close of each working day. The computation of NAV shall be in conformity with SEBI Regulations and guidelines as prescribed from time to time. The Direct Plan under the Investment Strategy will have separate NAV. Separate NAV will be calculated and disclosed for each option. The NAVs of the growth option and the Income Distribution cum Capital Withdrawal will be different after the declaration of the first IDCW.

Computation of NAV in case of investment in foreign securities:

For Valuation of Foreign Currency / Securities: On the valuation day, all the assets and liabilities denominated in foreign currency will be valued in Indian Rupees. The valuation price of the security will be converted to INR based on FBIL/any other designated agency, reference rate at the close of banking hours in India. If required, the AMC may change the source of determining the exchange rate. The Fund shall value its investments according to the valuation norms (Valuation Policy includes computation of NAV in case of investment in foreign securities), as specified in the Eighth Schedule of the Regulations, or such guidelines / recommendations as may be specified by SEBI from time to time. The broad valuation norms are detailed in the Statement of Additional Information.

Computation of NAV in case of investment in foreign ETFs: The closing price of the units of ETFs on overseas Stock Exchange shall be used for valuation by the Investment Strategy for such ETFs.

For other details such as policies w.r.t computation of NAV, rounding off investment in foreign securities and ETF, procedure in case of delay in disclosure of NAV etc. please refer to SAI.

Illustration for Computation of NAV:

$$1.109 = \frac{10,01,00,000.00 + 10,00,000.00 - 10,000.00}{1,00,00,000.00} = \frac{10,10,90,000.00}{1,00,00,000.00}$$

Methodology for calculation of sale and re-purchase price of the units of SIF Investment Strategy:

- **Ongoing Price for subscription (purchase)/switch-in (from other Investment Strategy/plans of the SIF) by investors (This is the price you need to pay for purchase/ switch-in):**

The Sale Price for a valid purchase will be the Applicable NAV.

The NAV will be calculated by rounding up to four decimal places for the Investment Strategy.

Assumed NAV Rs. 11 per unit. Entry Load: NIL.

Purchase Price = NAV + (Entry Load (%) * NAV)

Purchase Price = 11 + (0% * 11)

Purchase Price = 11 + 0

Purchase Price = Rs. 11/-

Transaction charges and other charges/expenses, if any, borne by the investors have not been considered in the above illustration.

- **Ongoing Price for redemption (sale)/switch out (to other Investment Strategy /plans of the SIF) by investors (This is the price you will receive for redemptions/ switch-outs):**

The Redemption Price / Switch out price of the Units is the price at which a Unit Holder can redeem Units of a Investment Strategy. It will be calculated as described below:

Assumed NAV Rs. 11.00 per unit. Exit Load: 1%

Sale Price = NAV – (exit load (%) * NAV)

Sale Price = 11 – (1%*11)

Sale Price = 11 – 0.11

Sale Price = Rs.10.89

Redemption Price will be calculated up to four decimal places for the Investment Strategy.

If the Investment Strategy has no Exit Load, the Redemption Price will be equal to the Applicable NAV.

Transaction charges and other charges/expenses, if any, borne by the investors have not been considered in the above illustration.

Investors may note that the AMC has a right to modify the existing Load structure in any manner or introduce/ change Exit Load or a combination of Exit Load and / or any other Load subject to a maximum as prescribed under the Regulations and with prospective effect only.

The SIF will offer that the redemption price is not lower than 97% of the applicable NAV.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. please refer to SAI.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationery, bank charges etc. All initial issue expenses pertaining to NFO were borne by the AMC. No NFO expenses were charged to the Investment Strategy.

C. ANNUAL INVESTMENT STRATEGY RECURRING EXPENSES

These are the fees and expenses for operating the Investment Strategy. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below. Further, as per clause 10.1.12 (a) of SEBI Master Circular dated June 27, 2024, all Investment Strategy related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the Investment Strategy only within the regulatory limits.

As per Regulation 52 (6) (c) of SEBI Regulations, the maximum annual recurring expenses of the Investment Strategy including the investment management fees that can be charged to the Investment Strategy is as follows:

Daily Net Assets (Rs.)	on the first Rs.50 crores	on the next Rs.250 crores of the daily net assets	on the next Rs. 1,250 crores of the daily net assets	on the next Rs. 3,000 crores of the daily net assets	on the next Rs. 5,000 crores of the daily net assets	On the next Rs. 40,000 crores of the daily net assets	On balance of the assets
% per annum	2.25%	2.00%	1.75%	1.60%	1.50%	Total expense ratio reduction of 0.05% for every increase of Rs. 5,000 crores of daily net assets or part thereof	1.05%

In addition to total expense limits mentioned above, the AMC may charge the following in terms of Regulation 52(6A) of SEBI Regulations:

- Brokerage and transaction cost incurred for the purpose of execution of trade shall be charged to the schemes as provided under Regulation 52 (6A) (a) upto 12 bps and 5 bps for cash market transactions and derivatives transactions (if permitted under the scheme) respectively. Any payment towards brokerage and transaction costs, over and above the said 12 bps and 5 bps may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52.
- Expenses not exceeding 0.05% p.a. of daily net assets towards Investment Management and Advisory Fees and the various sub-heads of recurring expenses mentioned under Regulation 52

(2) and (4) respectively of SEBI (MF) Regulations. Provided that such additional expenses shall not be charged to the schemes where the exit load is not levied or applicable.

The total expenses charged to the Scheme shall not exceed the limits stated in Regulation 52 of the SEBI (MF) Regulations and as permitted under SEBI Circulars issued from time to time. Any expenditure in excess of the SEBI regulatory limits shall be borne by the AMC or by the Trustee or the Sponsor.

The AMC has estimated the following annual recurring expenses on daily net assets of the Investment Strategy. Further, any change in the expense ratio will be updated on our website and the same will be communicated to investor via SMS / e-mail 3 working days prior to the effective date of change. For the actual current expenses being charged, the investor should refer to the website: <https://www.360.one/dyna-sif> :

The Goods and Service Tax on brokerage and transaction costs which are incurred for the purpose of execution of trade, will be within the limit of prescribed under Regulation 52 of SEBI Regulations.

\$ In terms of clause 10.1.7 of SEBI Master Circular dated June 27, 2024, in case exit load is not levied / not applicable, the AMC shall not charge the said additional expenses.

"Direct plan shall have a lower expense ratio excluding distribution expenses, commission etc. and no commission shall be paid from such plan."

ILLUSTRATION OF IMPACT OF EXPENSE RATIO ON INVESTMENT STRATEGY' S RETURN:

Particulars	Regular Plan	Direct Plan
Amount Invested at the beginning of the year	10,000,00	10,000,00
Returns before Expenses	1,500,00	1,500,00
Expenses other than Distribution Expenses	15,000	15,000
Distribution Expenses	5000	-
Returns after Expenses at the end of the Year	130,000	135,000

The purpose of the above illustration is to explain the impact of expense ratio of the Investment Strategy. Above calculation are bases on assumed NAV and Expenses. The actual NAV, expenses and return on your investment may be more or less.

All Investment Strategy related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily paid from the Investment Strategy only within the regulatory limits and not from the books of AMC, its associate, sponsor, trustees or any other entity through any route in terms of SEBI circulars, subject to the clarifications provided by SEBI to AMFI vide letter dated February 21, 2019 on implementation of clause 10.1.12 of Master Circular on Total Expense Ratio (TER) and performance disclosure for SIF.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the Investment Strategy. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC <https://www.360.one/dyna-sif> or may call at toll free no. 1800-2108-606 or your distributor.

Type of Load	Load chargeable (as % of NAV)
Exit Load	0.5% if redeemed within 3 months from date of allotment of units No exit load is payable for redemption after 3 months from the date of allotment of units.

In accordance with the requirements specified by the paragraph 10.4.1(a) of SEBI Master circular dated June 27, 2024, no entry load will be charged for purchase/additional purchase/switches accepted by the SIF. Similarly, no entry load will be charged with respect to applications for registrations under the Systematic Investment Plan (SIP)/Systematic Transfer Plan (STP) accepted by the SIF.

The entire exit load (net of Goods and Service Tax) received shall be credit back to the Investment Strategy.

- No Exit load shall be levied for switching between Plans/Options within the Investment Strategy.
- However, exit load will be applicable if the units are switched-out / redeemed from the Investment Strategy within the exit load period from the initial date of purchase.
- No Exit load will be levied on Units allotted on Re-investment of Income Distribution cum Capital Withdrawal.
- In case of Systematic Transactions such as Systematic Investment Plan (SIP), Systematic Transfer Plan (STP), Exit Load, if any, prevailing on the date of registration / enrolment shall be levied.

At the time of change in load structure in future, the AMC will take following steps:

- The addendum detailing the changes shall be attached to ISID and Key Information Memorandum (KIM). The addendum will be circulated to all the distributors so that the same can be attached to all ISID and KIM already in stock.
- Arrangements shall be made to display the changes/modifications in the ISID in the form of a notice in all investor service centres and distributors/brokers offices.
- The introduction of the exit load along with the details shall be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load.
- The SIF shall display the addendum on its website <https://www.360.one/dyna-sif>.

Section II

I. Introduction

A. Definition/interpretation

For detailed description of definitions/interpretations, please visit <https://www.360.one/dyna-sif>.

B. Risk Factors

- Standard Risk Factors:

- Investment in SIF involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price/value/interest rates of the securities in which the Investment Strategy invests fluctuates, the value of your investment in the Investment Strategy may go up or down depending on the factors and forces affecting the capital market/bullion market.
- Past performance of the Sponsors/AMC/SIF does not guarantee the future performance of the Investment Strategy.
- The name of the Investment Strategy does not in any manner indicate either the quality of the Investment Strategy or its future prospects and the returns. Investors are therefore urged to study the terms of offer carefully and consult their Investment Advisor before they invest in the Investment Strategy.
- The present Investment Strategy is not a guaranteed or assured return Investment Strategy.

- Investment Strategy Specific Risk Factors

Risks associated with investing in Equities and equity related instruments:

- a. Investments in the equity shares of the Companies are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Investment Strategy.
- b. The NAVs of Investment Strategies investing in equity will fluctuate as the daily prices of the individual securities in which they invest fluctuate and the units when redeemed may be worth more or less than their original cost.
- c. The value of the Investment Strategy's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all

sectors including equity and debt markets. Consequently, the NAV of the units of the Investment Strategy may fluctuate and can go up or down.

- d. Investors may note that Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- e. The sector weightage in the Investment Strategy would be different from that in the Index. Because of this the Investment Strategy returns could be divergent from the Index returns and could also under-perform if the sector calls do not go right as expected by the fund management team.

Risk associated with Investing in Debt and money market instruments

The performance of the Investment Strategy may be affected by changes in macroeconomic factors such as Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems.

Interest Rate/Price risk: This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices generally increase. The extent of fall or rise in the prices depends upon factors such as coupon, residual maturity of the security, micro and macroeconomic scenario as well as the yield level at which the security is being traded.

Credit Risk/Default risk: Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest &/or principal payment obligations. This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. Corporate bonds carry a higher credit risk than Government Securities. Within corporate bonds as well, there are different levels of safety. Credit risks of most issuers of debt securities are rated by independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A" denoting "Highest Safety") to "D" (denoting "Default"), with about 6 distinct ratings between the two extremes. A bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency. The highest credit rating (i.e. lowest credit risk) commands a lower yield for the borrower. Conversely, a lower rated credit borrower would raise funds at a relatively higher cost. On account of a higher credit risk for lower rated borrowers, lenders prefer higher rated instruments further justifying the lower yields.

Re-investment Risk: Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Counterparty Risk: This is the risk of failure of counterparty to the transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the Investment Strategy in case of counterparty default.

Inflation risk: Inflation, in most basic terms, erodes the purchasing power of money and also withers the value of existing investments; in other words, it reduces the purchasing power of a bond investor's future interest payments and principal, collectively known as "cash flows." Inflation also leads to higher interest rates, which in turn leads to lower bond prices.

Liquidity risk: The liquidity of a bond may change depending on market conditions leading to changes in the liquidity premium linked to the price of the bond. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio. There could therefore be difficulties in exiting from corporate bonds in times of uncertainties. Liquidity in a Investment Strategy therefore may suffer.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Investment Strategy investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Legislative Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Investment Strategies.

Risk of Rating Migration: It may be noted that the price of a rated security would be impacted with the change in rating and hence, there is risk associated with such migration.

Risks associated with Investing/trading in Derivatives

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Investment Strategy may not be able to sell or

purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risks associated with Securities Lending and Borrowing

Securities Lending and Borrowing (“SLB”) is an exchange traded product in India, with trades done on order matching platforms setup by the clearing corporation/house of recognized stock exchanges. In accordance with SEBI guidelines, there is a robust risk management system and safeguards exercised by the clearing corporation/house, which also guarantee financial settlement hence eliminating counterparty risk on borrowers.

The Investment Strategy may participate as a lender in the SLB market and lend securities held in the portfolio for earning fees from such lending to enhance revenue of the Investment Strategy. The key risk to the Investment Strategy is creation of temporary illiquidity due to the inability to sell such lent securities, till the time such securities are returned on the contractual settlement date or on exercise of early recall.

In case the Investment Strategy undertakes stock lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Investment Strategy should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Investment Strategy and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities lent. The Fund may not be able to sell such lent securities, and this can lead to temporary illiquidity.

Risks associated with segregated portfolio:

The unit holders may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange.

The risks associated in regard to the segregated portfolio are as follows:

- The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
- The security comprising the segregated portfolio may not realize any value.
- Listing of units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- The trading price of units on the stock exchange may be significantly lower than the prevailing Net Asset Value (NAV) of the segregated portfolio.

Risk factors associated with investment in Tri-Party Repo:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counter party risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL).

As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the Investment Strategy is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Tri-party Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the Investment Strategy may lose an amount equivalent to its contribution to the default fund.

Risk factors associated with investing in Non- Convertible Preference Shares

- **Credit Risk:** Credit risk is the risk that an issuer will be unable to meet its obligation of payment of dividend and/ or redemption of principal amount on the due date. Further, for non-cumulative preference shares, issuer also has an option to not pay dividends on preference shares in case of inadequate profits in any year.
- **Liquidity Risk:** The preference shares generally have limited secondary market liquidity and thus we may be forced to hold the instrument till maturity.
- **Unsecured in nature** - Preference shares are unsecured in nature and rank lower than secured and unsecured debt in hierarchy of payments in case of liquidation. Thus there is significant risk of capital erosion in case the company goes into liquidation.

Risk associated with Investment Strategy:

The primary objective of SIF Equity Long-Short Fund is to generate long-term capital appreciation by identifying and capitalizing on investment opportunities in equity and equity-related instruments while employing limited short exposure through derivatives to enhance returns and manage risk. The identification and execution of long and short strategies involve inherent uncertainties, and no assurance can be given that the Fund Manager will successfully locate profitable opportunities or accurately predict market movements. Market conditions, such as reduced volatility or limited

pricing inefficiencies, may constrain the fund's ability to generate alpha, potentially impacting returns. The fund's active management approach may lead to high portfolio turnover, resulting in elevated transaction costs. Additionally, there may be instances where market liquidity is insufficient to execute trades at optimal prices, increasing the cost and risk of implementing the strategy. While the portfolio typically includes liquid equities, differences in stock liquidity can pose challenges, making the long-short strategy complex, costly, and occasionally difficult to execute effectively.

Risk factors associated with potential change in tax structure:

An equity oriented fund has been defined under the Income Tax Act as an investment strategy where the investible funds are invested in equity shares of domestic companies to the extent of more than 65 per cent of the total assets of such fund. The percentage of equity shareholding of the fund shall be computed with reference to the annual average of the monthly averages of the opening and closing figures. As per the asset allocation, under normal circumstances, the Investment strategy shall invest minimum 80% of its total assets in Equity and Equity Related instruments. However, under defensive circumstances, where the debt / money market instruments offer better returns than the arbitrage opportunities available in cash and derivatives segments of equity markets, then the investment manager may choose to have a lower equity exposure for a prolonged period. In such a case, the fund may be regarded as a debt oriented fund as per extant Income Tax laws and consequently may not enjoy the favourable tax provisions available for equity oriented funds in that particular financial year. In such situation, a Unitholder who has redeemed the units during that financial year may end up paying capital gain tax as applicable to a debt fund and consequently would also not be able to derive any benefit of STT paid at the time of redemption. In view of the forgoing and individual nature of tax consequences, each Unit holder is advised to consult his / her own professional tax advisor.

Additional Risk viz. Basis Risk associated with imperfect hedging using Interest Rate Futures (IRF): The imperfect correlation between the prices of securities in the portfolio and the IRF contract used to hedge part of the portfolio leads to basis risk. Thus, the loss on the portfolio may not exactly match the gain from the hedge position entered using the IRF.

Risk factors associated with Short Selling

Short-selling is the sale of shares which are not owned by the seller at the time of trade. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock he shorted and returns the stock to close out the loan. If the price of the stock corrects, Short seller can buy the stock back for less than he received for selling it and earn profit (the difference between higher short sale price and the lower purchase price). If the price of stock appreciates, short selling results in loss. Thus, Short positions carry the risk of losing money and these losses may grow theoretically unlimited if the price increases without limit and shall result into major losses in the portfolio.

Risk factors associated with Securities Lending:

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Investment strategy

and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The investment strategy may not be able to sell lent out securities, which can lead to temporary illiquidity & loss of opportunity.

Risk factors associated with InvITs:

- **Price Risk:** Securities/Instruments of InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. The extent of fall or rise in the prices is a fluctuation in general market conditions, factors and forces affecting capital market, Real Estate and Infrastructure sectors, level of interest rates, trading volumes, settlement periods and transfer procedures.
- **Interest Rate Risk:** Securities/Instruments of InvITs run interest rate risk. Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase.
- **Credit Risk:** Credit risk means that the issuer of a InvIT security/ instrument may default on interest payment or even on paying back the principal amount on maturity. Securities/ Instruments of InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- **Liquidity Risk:** This refers to the ease with which securities/instruments of InvITs can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities/instruments for which a liquid market exists. As these products are new to the market they are likely to be exposed to liquidity risk.
- **Reinvestment Risk:** Investments in securities/instruments of InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or Dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Legal and Regulatory Risk:** The regulatory framework governing investments in securities/instruments of InvITs comprises a relatively new set of regulations and is therefore untested, interpretation and enforcement by regulators and courts involves uncertainties. Presently, it is difficult to forecast as to how any new laws, regulations or standards or future amendments will affect the issuers of InvITs and the sector as a whole. Furthermore, no assurance can be given that the regulatory system will not change in a way that will impair the ability of the Issuers to comply with the regulations, conduct the business, compete effectively or make distributions.

Risk Associated with Investment in REIT:

- **Price Risk:** Securities/Instruments of REITs are volatile and prone to price fluctuations on a daily basis owing to market movements. The extent of fall or rise in the prices is a fluctuation in general market conditions, factors and forces affecting capital market, Real Estate and Infrastructure sectors, level of interest rates, trading volumes, settlement periods and transfer procedures.

- **Interest Rate Risk:** Securities/Instruments of REITs run interest rate risk. Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase.
- **Credit Risk:** Credit risk means that the issuer of a REIT security/ instrument may default on interest payment or even on paying back the principal amount on maturity. Securities/ Instruments of REITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- **Liquidity Risk:** This refers to the ease with which securities/instruments of REITs can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities/instruments for which a liquid market exists. As these products are new to the market they are likely to be exposed to liquidity risk.
- **Reinvestment Risk:** Investments in securities/instruments of REITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or Dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Legal and Regulatory Risk:** The regulatory framework governing investments in securities/instruments of REITs comprises a relatively new set of regulations and is therefore untested, interpretation and enforcement by regulators and courts involves uncertainties. Presently, it is difficult to forecast as to how any new laws, regulations or standards or future amendments will affect the issuers of REITs and the sector as a whole. Furthermore, no assurance can be given that the regulatory system will not change in a way that will impair the ability of the Issuers to comply with the regulations, conduct the business, compete effectively or make distributions.

Risks associated with the Investment Strategy's Arbitrage Strategy:

The Investment Strategy may invest in equity and equity related instruments by identifying and exploiting price discrepancies in cash and derivative segments of the market. These investments by nature are volatile as the prices of the underlying securities are affected by various factors such as liquidity, time to settlement date, news flow, spreads between cash and derivatives market at different points of time, trading volumes, etc.

- There is no guarantee that the Fund Manager will be able to spot investment opportunities or correctly exploit price discrepancies in the different segments of the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The Investment Strategy is also expected to have a high portfolio churn, especially in a volatile market. There is an execution risk while implementing arbitrage strategies across various segments of the market, which may result in missed investment opportunities, or may also result in losses/high transaction costs.

- In case of a large outflow from the Investment Strategy, the Investment Strategy may need to reverse the spot-futures transaction before the settlement of the futures trade. While reversing the spot-futures transaction on the Futures and Options settlement day on the exchange, there could be a risk of volume-weighted-average-price of the market being different from the price at which the actual reversal is processed resulting in basis risk.
- While future market are typically more liquid than underlying cash market, there can be no assurance that ready liquidity would exist at all point in time for the Investment Strategy to purchase and close out a specific futures contract.
- In case of arbitrage, if futures are allowed to expire with corresponding buy/sell in cash market, there is a risk that price at which futures expires, may/may not match with the actual cost at which it is bought/sold in the cash market in last half an hour of the expiry day (Weighted average price for buy or sell).

Risks associated with Overseas Securities:

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Investment Strategies, the Investment Strategies may invest in overseas markets and securities which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country concerned, repatriation of capital due to exchange controls and political circumstances. Further, the Investment Strategy may not be able to invest in overseas markets if overseas limits as per RBI and SEBI circulars are exhausted at AMC or industry level which may negatively impact the performance of the Investment Strategies.

i. Currency Risk: The Investment Strategy may invest in overseas securities and the income from those securities may be quoted in currencies which are different from the Investment Strategies base currency. The performance of the Investment Strategy may therefore be affected by movements in the exchange rate between the currencies in which the assets are held and the Investment Strategies base currency and hence there can be the prospect of additional loss or gain for the Unit Holder than what may be normally derived from the assets in which the Investment Strategy invests. The performance of the Investment Strategy fund may also be subject to exchange control regulations. Conversion into foreign currency or transfer from some markets of proceeds received from the sale of securities cannot be guaranteed. Exchange rate fluctuations may also occur between the trade date for a transaction and the date on which the currency is acquired to meet settlement obligations. Movements in currency exchange rates can adversely affect the return of your investment.

ii. Risks arising from exhaustion of overseas limits as per applicable SEBI and RBI circulars: The Investment Strategies capability to invest in overseas securities is subject to the limits assigned by the SEBI & RBI from time to

time basis. In case of exhaustion of the limits to invest in overseas securities is exhausted either at an individual Mutual Fund level or at Industry level or otherwise as restricted by SEBI or RBI, the Investment Strategy may not be able to allocate and invest in overseas securities and the AMC will suitably reallocate the proceeds to other investments as permissible under the asset allocation specified in the Investment Strategy document.

Risks associated with investments in units of mutual funds

Investment in units of Mutual Fund scheme involves investment risks including the possible loss of principal. As the price / value / interest rates of the underlying securities in which the mutual fund scheme invests fluctuates, the value of units of mutual fund scheme may go up or down. The value of underlying securities may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods etc.. The NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by liquidity in the securities market. Investment in units of mutual fund scheme is also exposed to risk of suspension of subscriptions / redemptions of the units, change in fundamental attributes etc. Since the Scheme may invest in schemes of Mutual Funds, scheme specific risk factors of each such mutual fund schemes will be applicable to the Scheme portfolio.

C. Risk Mitigation Strategies

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Investment Strategy would be made as per the investment objective of the Investment Strategy and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Investment Strategy. The risk control process would include identifying the risk and taking proper measures for the same. Further, AMC has put in place a Front Office System for managing risk. The system has incorporated the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

Risk control measures with respect to investment Equity and Equity related instruments

Concentration Risk: Concentration risk represents the probability of loss arising from heavy exposure to a particular group of sectors or securities.

Mitigation: The Investment Strategy will try to mitigate this risk by diversifying the investment into the large number of companies and keep stock-specific concentration risk relatively low.

Market Risk: Equity and Equity related securities by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.

Mitigation - Market risk is a risk which is inherent to an equity Investment Strategy. The Investment Strategy will try to reduce the market risk by undertaking active portfolio management as per the investment objective.

Liquidity risk: The liquidity of investments made in the Investment Strategy may be restricted by trading volumes and settlement periods

Mitigation- As such the liquidity of stocks that the Investment Strategy invests into could be relatively low. The Investment Strategy will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time.

Risk control measures with respect to Debt & Money Market Instruments

Market Risk / Interest Rate Risk: Changes in interest rates may affect the Investment Strategy's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. The price movement up and down in fixed income securities will lead to possible movements in the NAV.

Mitigation - In a rising interest rates scenario the Investment Strategy may increase its investment in money market securities whereas if the interest rates are expected to fall the allocation to debt securities with longer maturity may be increased thereby mitigating risk to that extent.

Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).

Mitigation- The Investment Strategy may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds.

Credit risk or default risk: It refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Mitigation—As part of the due diligence, management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower. In case of securitized debt instruments, the Investment Strategy will ensure that these instruments are sufficiently backed by assets.

Risk control with respect to derivatives

As and when the Investment Strategy trades in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The Investment Strategy may invest in derivative for the purpose of hedging, portfolio balancing and other purposes as may be permitted under the Regulations.

Mitigation- Exposure with respect to derivatives shall be in line with regulatory limits and the limits specified in the ISID. All equity derivatives trade will be done only on the exchange with guaranteed settlement.

Risks control with respect to Investments in REITs :

The Investment Manager endeavours to invest in REITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst

others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.

Risks control with respect to Investments in InvITs:

The Investment Manager endeavours to invest in InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.

Provided further, the Investment Strategy may invest in unlisted nonconvertible debentures (NCDs) not exceeding 10% of the debt portfolio of the Investment Strategy subject to the condition that such unlisted NCDs have a simple structure (i.e. with fixed and uniform coupon, fixed maturity period, without any options, fully paid up upfront, without any credit enhancements or structured obligations) and are rated and secured with coupon payment frequency on monthly basis. Provided further that SIF Investment Strategy shall comply with the norms under this clause within the time and in the manner as may be specified by the Board.

Provided further that, investment in unrated debt and money market instruments, other than government securities, treasury bills, derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. by SIF Investment Strategy shall be subject to the following:

- a. Investments should only be made in such instruments, including bills re-discounting, usance bills, etc., that are generally not rated and for which separate investment norms or limits are not provided in SEBI (Mutual Fund) Regulations, 1996 and various circulars issued thereunder.
 - b. Exposure of SIF Investment Strategy in such instruments, shall not exceed 5% of the net assets of the Investment Strategy.
 - c. All such investments shall be made with the prior approval of the Board of AMC and the Board of trustees.
- An investment strategy under the SIF shall not invest more than 25% of its NAV in debt and money market securities of a particular sector.
 - Transfer of investments from one Investment Strategy to another Investment Strategy in the same SIF, shall be allowed only if:
 - (a) such transfers are made at the prevailing market price for quoted Securities on spot basis (spot basis shall have the same meaning as specified by Stock Exchange for spot transactions).
 - (b) the securities so transferred shall be in conformity with the investment objective of the Investment Strategy to which such transfer has been made and
 - (c) the Transfer is in conformity with additional safeguards as prescribed by clause 12.30 of SEBI Master Circular dated June 27, 2024.
 - Debentures, irrespective of any residual maturity period (above or below one year), shall attract the investment restrictions as applicable for debt instruments as specified under Clause 1 and 1 A of Seventh Schedule to the Regulations.
 - No term loans for any purpose may be advanced by the Fund and the Fund shall not borrow except to meet temporary liquidity needs of the Investment Strategy for the purpose of repurchase, redemption of Units or payment of interest or IDCWs to Unit Holders, provided that the Fund shall not borrow more than 20% of the net assets of the Investment Strategy and the duration of such a borrowing shall not exceed a period of six months.

Investment restrictions relating to derivative investments:

In accordance with SEBI circulars dated February 27, 2025 and clause 12.25 of SEBI Master Circular dated June 27, 2024, the following conditions shall apply to the Investment Strategy's participation in the derivatives market. Please note that the investment restrictions applicable to the Investment Strategy's participation in the derivatives market will be as prescribed or varied by SEBI or by the Trustees (subject to SEBI requirements) from time to time.

Clause 6 of SEBI circular dated February 27, 2025 and clause 12.25 of SEBI Master Circular dated June 27, 2024 have prescribed the following investment restrictions w.r.t. investment in derivatives:

- i. The investment strategies under the SIF may take exposure of up to 25% of the net assets in permissible exchange traded derivative instruments, specifically for purposes other than hedging and portfolio rebalancing.

ii. As specified under paragraph 12.25.11.1 of the Master Circular for Mutual Funds dated June 27, 2024, the exposure to derivative contracts for the investment strategies under SIF shall be computed as follows:

1. Futures (long and short) = Futures Price * Lot Size * Number of Contracts

2. Options bought = Option premium paid * Lot size * Number of contracts

3. Options sold = Market price of the underlying * Lot size * Number of contracts

4. In case of any other derivative exposure, the exposure shall be calculated as the notional market value of the contract.

iii. The total exposure at any point of time shall be the sum of exposure through instruments in both the cash market and derivatives market.

iv. Offsetting of exposure at the portfolio level shall be allowed for:

1. Cash and derivative positions on the same underlying security

2. Between derivative positions on the same underlying security.

Some of the examples where offsetting is allowed or disallowed have been provided in SEBI SIF Circular dated 27th February, 2025 are presented below:

Sr. No.	Position 1	Position 2	Offsetting allowed/not?	Net exposure to be considered
1	Equity Long	Futures Short	Yes	Equity Long only
2	Equity /Futures Long	Call option Short	Yes	Equity /Futures Long only
3	Equity /Futures Long	Put option Long	Yes	Equity /Futures Long only
4	Futures Short	Call option Long	Yes	Futures Short only
5	Futures Short	Put option Short	Yes	Futures Short only
6	Call option Long	Call option Short	Yes	Call option Short only

If the redemption request amount exceeds the balance lying to the credit of the Unitholder’s said account, then the fund shall redeem the entire amount lying to the credit of the Unitholder’s account in that Investment Strategy/Option.</p> <p>If an investor has purchased Units on more than one Business Day, the Units purchased prior in time (i.e. those Units which have been held for the longest period of time), are deemed to have been redeemed first, i.e. on a First In First Out Basis.</p> <p>Where Units under a Investment Strategy are held under both</p>

Regular and Direct Plan and the redemption / Switch request pertains to the Direct Plan, the same must clearly be mentioned on the request (along with the folio number), failing which the request would be processed from the Regular Plan. However, where Units under the requested Option are held only under one Plan, the request would be processed under such Plan

a. Redemption through physical applications:

A Transaction Slip or Common Transaction Form (CTF) can be used by the Unit Holder to request for Redemption. The requisite details should be entered in the Transaction Slip or CTF and submitted at an ISC. Transaction Slips or the CTF can be obtained from any of the ISCs.

Payment of Proceeds Resident Investors:

Redemption proceeds will be paid to the investor by way of transfer to bank account as available on the records of the Registrar.

Physical despatch of redemption or repurchase proceeds shall be carried out only in exceptional circumstances as published by AMFI/ SEBI from time to time.

In case of physical dispatch, the bank name and bank account number, as specified in the Registrar's records, will be mentioned in the cheque/demand draft. The redemption proceeds will be sent by courier or by postal services/UCP. The dispatch for the purpose of delivery through the courier / postal department, as the case may be, shall be treated as delivery to the investor. The AMC / Registrar are not responsible for any delayed delivery or non-delivery or any consequences thereof, if the dispatch has been made correctly as stated in this paragraph.

Note: The AMC, at its discretion at a later date, may choose to alter or add other modes of payment. The Redemption proceeds will be sent by courier or by postal service. The dispatch for the purpose of delivery through the courier / postal department, as the case may be, shall be treated as delivery to the investor. The AMC / Registrar is not responsible for any delayed delivery or non-delivery or any consequences thereof, if the dispatch has been made correctly as stated in this paragraph.

Non-Resident Investors

For NRIs, Redemption proceeds will be remitted depending upon the source of investment as follows:

(i) Repatriation Basis: When Units have been purchased through remittance in foreign exchange from abroad or by cheque / draft issued from proceeds of the Unit Holder's FCNR deposit or from funds held in the Unit Holder's Non Resident (External) account

kept in India, the proceeds can be remitted to the Unit Holder in foreign currency (any exchange rate fluctuation will be borne by the Unit Holder). The proceeds can also be sent to his Indian address for crediting to his NRE / FCNR / Non-Resident (Ordinary) Account, if desired by the Unit Holder.

(ii) Non Repatriation Basis: When Units have been purchased from funds held in the Unit Holder's Non-Resident (Ordinary) Account, the proceeds will be sent to the Unit Holder's Indian address for crediting to the Unit Holder's Non-Resident (Ordinary) account.

For FPIs, the designated branch of the authorised dealer may allow remittance of net sale / maturity proceeds (after payment of taxes) or credit the amount to the Foreign Currency account or Nonresident Rupee account of the FPI maintained in accordance with the approval granted to it by the RBI. The Fund will not be liable for any delays or for any loss on account of any exchange fluctuations while converting the Rupee amount in foreign exchange in the case of transactions with NRIs / FPIs.

The proceeds may be paid by way of direct credit through which the investor's bank account specified in the Registrar's records is credited with the Redemption proceeds. The Direct Credit facility is available for specific banks with whom AMC have a tie up from time to time. Investors need to check with the AMC for an updated list of the Direct Credit Banks. Investors having bank mandates where the AMC has a Direct Credit facility will receive redemption / IDCW proceeds by way of Direct Credit only and not cheques.

The Fund may make other arrangements for effecting payment of Redemption proceeds in future.

Redemption by investors who hold Units in dematerialized form:

Redemption request for Units held in demat mode shall not be accepted at the offices of the SIF/AMC/Registrar. Unit holders shall submit such request only through their respective Depository Participant or through stock exchange platforms.

Application through Stock Exchange Infrastructure (MFSS/ BSE StAR MF Platform): Investors wishing to redeem their units held in demat mode in Scheme listed on MFSS and BSE StAR MF platform, can place their redemption request with the AMFI Certified Stock Exchange Brokers by providing Depository Instruction Slip with redemption details. The AMFI Certified Stock Exchange Broker will place the redemption order in the system and will provide a confirmation slip to the investor. The redemption proceeds will be directly credited to the investor's bank account, as per the bank account details recorded with the Depository Participant.

	<p>Application through MF Utility: All financial and non-financial transactions pertaining to Schemes of 360 ONE Mutual Fund can be done through MFU either electronically on www.mfuonline.com as and when such a facility is made available by MFUI or physically through the authorized Points of Service (“POS”) of MFUI with effect from the respective dates as published on MFUI website against the POS locations. The list of POS of MFUI is published on the website of MFUI at www.mfuindia.com as may be updated from time to time. The Online Transaction Portal of MFU i.e. www.mfuonline.com and the POS locations of MFUI will be in addition to the existing Official Points of Acceptance (“OPA”) of the AMC. The uniform cut-off time as prescribed by SEBI and as mentioned in the SID / KIM of respective schemes shall be applicable for applications received on the portal of MFUI i.e. www.mfuonline.com . However, investors should note that transactions on the MFUI portal shall be subject to the eligibility of the investors, any terms & conditions as stipulated by MFUI / Mutual Fund/ the AMC from time to time and any law for the time being in force. Investors are requested to note that, MFUI will allot a Common Account Number (“CAN”), a single reference number for all investments in the Mutual Fund industry, for transacting in multiple Schemes of various Mutual Funds through MFU and to map existing folios, if any. Investors can create a CAN by submitting the CAN Registration Form (CRF) and necessary documents at the MFUI POS. The AMC and / or its Registrar and Transfer Agent (RTA) shall provide necessary details to MFUI as may be needed for providing the required services to investors / distributors through MFU. Investors are requested to visit the websites of MFUI or the AMC to download the relevant forms.</p>
<p>Bank Mandate</p>	<p>As per the directives issued by SEBI, it is mandatory for applicants to mention their bank account numbers in their applications for purchase or redemption of Units. If the Unit-holder fails to provide the Bank mandate, the request for redemption would be considered as not valid and the Fund retains the right to withhold the redemption until a proper bank mandate is furnished by the Unit-holder and the provision with respect of penal interest in such cases will not be applicable/ entertained.</p> <p>Multiple Bank Account Registrations: In compliance with AMFI Best Practice Guidelines Circular No.17/2010-11 dated October 22, 2010 and AMFI Best Practice Guidelines Circular No. 26/2011-12 dated March 12, 2012, DynaSIF offers its investors the facility to register multiple bank accounts in their folios to receive redemption / IDCW proceeds.</p>

Registration of Multiple Bank Accounts in respect of an Investor

Folio: An Investor can register with the Fund, upto 5 bank accounts in case of individuals and HUFs and upto 10 in other cases. Registering of Multiple Bank Accounts will enable the Fund to systematically validate the paying of funds and avoid acceptance of third party payments. For the purpose of registration of bank account(s), Investor should submit Bank Mandate Registration Form (available at the CSCs/ AMC Website) together with one of the following documents:

- a. Cancelled original cheque leaf in respect of bank account to be registered where the account number and names of the account holders are printed on the face of the cheque; or
- b. Bank statement or copy of Bank Pass Book page with the Investor's Bank Account number, name and address.;
- c. Bank letter / certificate on its letter head certifying the account holder's name, account number and branch address [Such letter / certification should be certified by the Bank Manager with his / her full name, signature, employee code.]

The above documents will also be required for change in bank account mandate submitted by the Investor. The AMC will register the Bank Account only after verifying that the sole/ first joint holder is the holder / one of the joint holders of the bank account. In case if a copy of the above documents is submitted, Investor shall submit the original to the AMC/ Service Centre for verification and the same shall be returned. In case of Multiple Registered Bank Account, Investor may choose one of the registered bank accounts for the credit of redemption/ IDCW proceeds (being "Pay-out bank account"). Investor may however, specify any other registered bank accounts for credit of redemption proceeds at the time of requesting for the redemption. Investor may change such Pay-out Bank account, as necessary, through written instructions. However, if request for redemption is received together with a change of bank account (unregistered new bank account) or before verification and validation of new bank account, the redemption request would be processed to the currently registered default old bank account. For further details please refer to paragraph on 'Registration of Multiple Bank Accounts in respect of an Investor Folio' in the SAI

Discontinuation of Change of Bank Account Mandate along with redemption/IDCW proceeds facility:

Discontinuation of Change of Bank Account Mandate along with redemption/IDCW proceeds facility. In compliance with AMFI Best Practice Guidelines Circular No.17/2010-11 dated October 22,

	<p>2010, consequent to introduction of “Multiple Bank Accounts Facility,” the existing facility of redemption/ IDCW proceeds with change of bank mandate is discontinued by the Fund w.e.f. November 15, 2010. New bank accounts can only be registered using the designated “Multiple Bank Account Registration Form”. Further please note the following important points in this regard:</p> <p>(i) Proceeds of any redemption/IDCW will be sent only to a bank account that is already registered and validated in the folio at the time of redemption transaction processing.</p> <p>(ii) Unit holder(s) may choose to mention any of the existing registered bank accounts with redemption/ IDCW payment request for receiving redemption/IDCW proceeds. If no registered bank account is mentioned, default bank account will be used.</p> <p>(iii) If unit holder(s) provide a new and unregistered bank mandate or change of bank mandate request with a specific redemption/IDCW payment request (with or without necessary supporting documents) such bank account may not be considered for payment of redemption/IDCW proceeds, or the Fund may withheld the payment for upto 10 calendar days to ensure validation of new bank mandate mentioned.</p> <p>Valid change of bank mandate requests with supporting documents will be processed within 10 business days of necessary documents reaching the office of RTA and any financial transaction request received in the interim will be carried based on previous details only.</p>
